

Jonathan Harris

Principal Advisor

[jharris@techpargroup.com](mailto:jharris@techpargroup.com)

Mr. Harris has over 40 year of experience as an Information Technology consultant specializing in the use of technology to gain competitive advantage. Mr. Harris was one of the lead data security and control partners in PW and PwC involved in founding this practice, developing the marketing strategy and building the practice. As the leader of this practice he performed numerous engagements for telecommunications, financial, government, and manufacturing clients to evaluate security policies, organization, procedures, and access control software and perform "hacking" to test security. In this capacity Jonathan has worked closely with internal audit departments and CIOs and Audit Committee's to help them establish planning and risk ranking methodologies, develop work programs and perform joint and outsourced work for the internal audit area. Jonathan also specialized in the use of advanced technology to improve the efficiency and conduct of the audit process.

His industry experience includes major control and security and audited related work for a number of international financial institutions, technology companies, utility, communications, government, education and manufacturing clients. Technical experience includes auditing and review of controls for mainframe, LAN, communications and distributed systems in batch, on-line and data base environments. Mr. Harris is a frequent speaker on topics related to computer security, back up and recovery and long-range data processing planning.

Mr. Harris holds a B.S.C., Accounting and Economics from the University of Pennsylvania (Thesis title: Interdivisional Transfer Pricing and an M.B.A., Operations Research from the Indiana University where he held a Research and Teaching Fellowship. He is a Certified Public Accountant, New York State and Pennsylvania State and a holder of Certificate in Data Processing and Certified Information Systems Auditor.
