

Brandie Lerner

Associate Advisor

blerner@techpargroup.com

Brandie Lerner has 30 years experience in the IT/pharmaceuticals and records management arenas. She is a seasoned people and project manager, whose areas of expertise include process definition and reengineering, quality assurance, and regulatory compliance.

A long-term Pfizer colleague, Brandie directed the IT department of their Brooklyn, NY manufacturing facility, where her team serviced 1,100 users in all aspects of software development and implementation, database administration, technical writing, and network/application/desktop support. She also ran their successful Year 2000 Program, allowing for immediate resumption of plant operations (valued at \$1 million a day). Most recently, Brandie was involved in the launch of Pfizer's new global electronic archive service. This program provides records disposition and management to all functional areas within the company for both structured and unstructured content.

A certified software quality assurance auditor, Brandie has expertise in GxP systems evaluation, development, validation, and implementation. She is experienced in dealing with the FDA and other regulatory inspectors. She enjoys training and presenting, and has taught at both the elementary school and college levels.

Brandie has an M.S. in Computer Science from DePaul University and a B.S. in Information Science from Northeastern Illinois University.
