

Joe Cataldo

Associate Advisor

jcataldo@techpargroup.com

Mr. Cataldo has over a decade of experience managing project delivery and architecture for services organizations. Prior to joining TechPar he was Head of Delivery for Actimize Europe, a leading provider of Risk Management software in the financial services industry, where he built and managed the European Professional Services Practice. Mr. Cataldo was also responsible for the management, delivery and relationship management for all real time fraud monitoring for Bank of America.

Mr. Cataldo has significant technical depth in IT project management, logical and physical data design/modeling, Business Activity Monitoring, Business Intelligence, data warehouse architecture, dimensional modeling and JAD facilitation. He is experienced in the full development life cycle, with experience defining, planning and managing new projects, working as lead designer, working as a member of an application programming team and implementing new systems.

Mr. Cataldo has a B.S. in Electrical Engineering and an MBA from the Wharton School of Business. His professional experience includes delivery director for the leading compliance software provider, project manager and lead designer for major initiatives at Fortune 100 companies, including Goldman Sacs, JP Morgan Chase, Morgan Stanley and GE Capital adjunct professorship at the city universities, and work at a Deloitte Consulting.
