Ari Neugroschl

Principal, TechPar Group

aneugroschl@techpargroup.com

Ari Neugroschl is a visionary, entrepreneurial IT executive, with over 25 years' experience providing enterprise-wide leadership, guiding strategic direction and transformational decision making in business and technical initiatives. He drives large and complex IT organizations to enable agile innovation, business growth and operational excellence. Leveraging a collaborative style to build and lead high-performing cross-organizational teams to architect, implement, manage and streamline intricate IT designs.

Mr. Neugroschl has extensive experience with mergers and acquisitions and has held various executive leadership roles as a VP of IT in the Biomedical Device field for the past decade. He recently managed a large corporate healthcare merger and alignment and was instrumental in guiding the strategic consolidation, integration, growth and profitability initiatives across the Americas. In addition, with a focus on proactive and offensive security, he headed up a global security initiative to evaluate the global security footprint and reimagine new initiatives to harden external and internal security postures.

Prior to this, he held additional senior executive positions as a VP leading IT, Quality Assurance, Regulatory, Customer Service and Technical Support organizations. His leadership of these business areas led to rapid growth of a startup biomedical device company, progressing through public IPO, and ultimately into a $15B multinational public corporation.

Mr. Neugroschl has architected and led projects in infrastructure, cybersecurity, ERP and CRM solutions to enable strong collaboration and efficiency gains, while simultaneously strengthening the security position and resiliency of systems and processes. He has also partnered with business leaders driving custom system development to support the corporate roadmap, enable nimble business decisions and visibility, while maintaining proper IT governance and controls.

Mr. Neugroschl has a collaborative and analytical approach to secure commitment, support and trust from all relevant stakeholders. He has a consistent record of building cross-organizational teams, developing high-performing talent and teams to architect, implement, manage, and streamline complex IT designs. These skills bring increasing revenue while also decreasing costs across the organization. He brings visionary strategic expertise that can increase profitability to any company.

Mr. Neugroschl holds a BA degree in Economics from Yeshiva University.
